I'm a UI/UX designer with over a year of experience creating easy-to-use and visually appealing designs. I enjoy working on everything from wireframes and prototypes to full UI designs. Along with my design skills, I also have experience in video editing, graphic design, and front-end web development, which helps me bring ideas to life in a more complete way. I'm passionate about crafting designs that not only look great but also make users' experiences smoother and more enjoyable.

Experience

08/2023 - Present

UI/UX Designer
Agicent App Development Pvt. Ltd.

- Started as a Graphic Design Intern and, within 2 months, took charge of all social media design efforts.
- Created daily graphics for social media platforms, ensuring consistent and engaging content.
- Collaborated closely with development teams to ensure seamless project execution and design integration.
- Successfully managed multiple projects simultaneously, balancing client and internal deadlines.
- Led the design for in-house and client projects, including web applications, websites, and mobile apps.

Key Achievements

- Independently designed the user interface for a web-based back-office software, 'ZainiAi,' within a month and a half, covering over 100 distinct user flows
- Managed multiple ongoing client projects, inlcuding big projects such as "dawnhealth", "HasFit" etc.

Education
